RESOURCES POLICY

The international journal of minerals policy and economics

Volume contents and author index for Volume 22 (1996)

RESOURCES POLICY

Resources Policy is an international journal devoted to minerals policy and economics, aimed at economists and decision makers in academia, government and industry. Submissions are invited that analyse issues of public policy, economics and business in the areas of mining, minerals, metals and materials. Topics include, among others, resource availability, exploration and development, production and consumption, markets and price formation, international trade, environmental policy and management, taxation, investment and finance. Submissions also are invited on related natural resource topics of interest and importance to the minerals community, such as sustainability, natural resources in national income accounting, and other topics from environmental and energy economics.
